Everything you need to ship
Powerful tools integrated into one seamless workflow.
Version Control
Manage repositories, branches, and commits with enterprise-grade precision and speed.
Pull Requests
Collaborate on code changes with reviewers and merge securely.
Secure Access
Role-based permissions, JWT authentication, and audit logs keep your code safe.
Issue Tracking
Track bugs and feature requests with status updates and assignments.
Team Collaboration
Real-time collaboration tools, team management, and activity feeds.
Developer Analytics
Visual insights into contribution graphs, commit velocity, and team performance.

Why Developers Choose CodeOrbit

- **All-in-one efficiency**
  No more context switching between Jira, GitHub, and Slack.
- **Lightning fast performance**
  Built on modern tech for instant page loads and interactions.
- **Developer-first design**
  Dark mode by default, keyboard shortcuts, and CLI integration.

10x
FASTER DEPLOYMENT

50%
LESS CONTEXT SWITCHING
